

Old Town Hall Restoration

Currently, the Crosby Township Historical Society's accumulated and donated historical documents and items have been housed in the township's Old Town Hall leased to the Society by the township officers. Over the years, the interior of the Old Town Hall has been changed. It was decided by the Society's Board of Trustees that it was a worthy project to restore the building with the intent to bring back some of its former décor as well as update its efficiency. Work began in the Spring after the Society's documents were packed away. Member volunteers tore down the suspended ceiling, paneling, unnecessary ductwork, etc. just in time to discard the debris in the township's dumpsters during Cleanup Days. Some items were reclaimed by township maintenance. Work was halted when a swarm of honey bees made their residence in one of the building's walls under a window. The bees were saved and moved by Scott and Chrissy Wegman to restart a new hive. Much work is yet to be done. Donations of time, money, and /or materials are welcomed. Contact project managers, Tony Torres (581-9337) or Duane Singleton (319-4166) for more information. A power point presentation of the "Old Town Hall Restoration" was presented at the Society's July meeting and the August Township Trustee Meeting.
